Reading

No Pain No Gain^۱

Human knowledge develops with scientists' hard work. Many great men and women try hard to find facts, solve problems and invent things.

Some of these scientists did not have easy lives. But they tried hard when they were working on problems. They never felt weak when they were studying. They never gave up when they were doing research.

There are great stories about scientists and their lives. One such a story is about Thomas Edison. As a young boy, Edison was very interested in science. He was very energetic and always asked questions. Sadly, young Edison lost his hearing at the age of 12. He did not attend school and learned science by reading books in the library himself. When he grew up he worked in different places, but he never lost his interest in making things. Edison was famous for doing thousands of experiments to find answers to problems. He said, "I never quit until I get what I'm after". Edison had more than 1,000 inventions and was very successful at the end of his life.

Many great names had stories like this. But the key to their success is their hard work and belief in themselves. If you want to get what you want, work hard and never give up.
